IT 'S UP TO YOU!

**ANOTHER SHORT
STORY**

**WRITTEN BY
MANUEL MOLINA OSORIO**

A TODOS LOS LECTORES

Como profesor de inglés, siento un inmenso honor y alegría, al poder realizar esta obra de lectura en el segundo idioma, dedicada a mi amada familia con este gusto por la escritura gracias a mi hijo Manuel Jesús y en especial dedicación a cada uno de los estudiantes a lo largo de Chile de la corporación SNA EDUCa de la cual he sido orgullosamente parte por un poco más de una década. Soy un convencido de que el inglés abre infinitas oportunidades, y este trabajo viene a incentivar, aportar para alcanzar este objetivo tanto personal como académico y laboral. Queridos y queridas colegas, estimados estudiantes de la Red SNA EDUCa, en sus manos les dejo la aventura de viajar a través de la lectura y este título en particular; tomar acción del cuidado de nuestro medio ambiente. Infinitas gracias a quienes aportaron con su talento, tiempo y buena disposición en la realización, confección y revisión de este cuento.

Manuel Jesús Molina Osorio

Why is it
raining
heavily?

Why do we
have this
extremely hot
weather?

Have you ever wondered why we are commonly having lightning and thunderstorms every now and then? Well, since the nineties it has been a global issue and a lot of people are talking about the climate change, this non-stop condition in which

we are destroying our own planet earth with our careless actions every day... The Question Is, What Are You Actually Doing To Preserve Our Future On This

Magnificent Planet?

I am a teacher and scientist from chile, I love working with students and I am passionate about it and right now; I am looking forward to delivering this significant message not only to practice reading in english as a second language

My Name Is Mr. Amazon

BUT TO ENGAGE AND
MOTIVATE YOU TO DO
YOUR PART IN THIS
CHARMING STORY.

WE ALL HAVE DREAMS, DON'T WE?

We constantly think about this year, what is it going to be like? What surprises are out there for me? Am I doing well in social media? What's up on tik-tok? Can I afford what I would like to have? What am I going to eat on a special friday? And go on.

Sometimes it is always about the self but what about the “it” and yes!, I mean everybody’s home, the blue planet in the vast solar system that I am so astonished and interested in.

Come on! You can do something as little as taking a short shower, but at the same time you may contribute a great deal by organizing your local community, it does not matter what, when, why, where, whom... the step ahead, the action is the only thing that truly matters.

SO,
ARE YOU
READY
TO REDUCE
your footprint?

I Kindly Invite You, Your
Classmates, Your Families, Your
Friends To Be The Generation
That Made Up Our Minds That
We Are Living For Rent Free In
A Place That We All Can Say Is
Home...

GO
GREEN
FOR OUR
TREES,
GO BLUE
FOR OUR
OCEANS

Or simply

GoForIt!

Special thanks to my American friend from Spring City, Utah, Bryn Burningham and my professor from Universidad del Bío-Bío Sandra Molina Castillo for revising this story.

PATROCINADO POR

**WRITTEN BY
MANUEL MOLINA OSORIO**

This intended short story is to connect the people to a constant and remarkable change and respect for our nature, the environment, all living creatures and the future!
